

Supplementary Material

for

Adams, A., Krygier, R., Hook, T., McNalty, C., Harvey, J. E., 2023. A case study: Growth of tree-form willow driven by cool, wet springs and warm, dry summers in Teet'it Zheh (Fort McPherson), Northwest Territories, Canada. *Tree-Ring Research* 79(2):60–66.

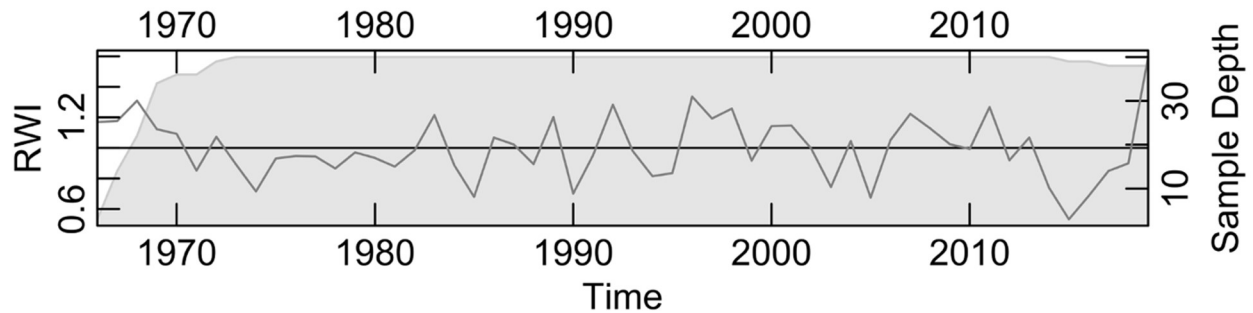

Figure S1. Standard chronology and sample depth over time (years). Standard chronology is represented by a dark grey line with Ring Width Index (RWI) on the left axis, and sample depth (number of trees) is represented by grey shaded area on right axis.

Table S1. Mensuration data collected for each willow sample.

TREE	DBH (cm)	HEIGHT (m)
1	12.5	11.72
2	14.4	11.33
3	14	12.56
4	8.5	9.96
5	9.3	11.15
6	12.8	11.42
7	10.6	11.24
8	13.3	12.35
9	12.4	12.66
10	11.3	13.5
11	13.1	12.01
12	13.7	11.8
13	12.7	11.73
14	12.3	11.5
15	15.1	10.12
16	11.8	11.06
17	11.4	10.71
18	12.5	11.97
19	10.6	12.31
20	9.5	12.01
21	9.6	10.91
22	13.3	12.32
23	15	12.15
24	10.7	11.17
25	11.3	10.99
26	12.5	10.77
27	9.4	10.75
28	12.6	10.55
29	10.8	10.82
30	10.7	10.71
31	11.7	10.9
32	12.8	10.8
33	13.1	11.72
34	14.6	12
35	10.2	10.3
36	13.7	11.76
37	12.5	11.25
38	10.2	10.1
39	17.1	12.67
40	8.8	11.6
